Nemeth Code Tutorial Available for BrailleNote mPower

The Nemeth code is the leading braille code for representing mathematical symbols used in the United States. Learning the Nemeth code is crucial to blind students and adults who need to perform mathematics, opening doors in education and employment.

The tutorial is presented in 18 chapters with lessons covering the basics of writing numbers up to calculus and sta-

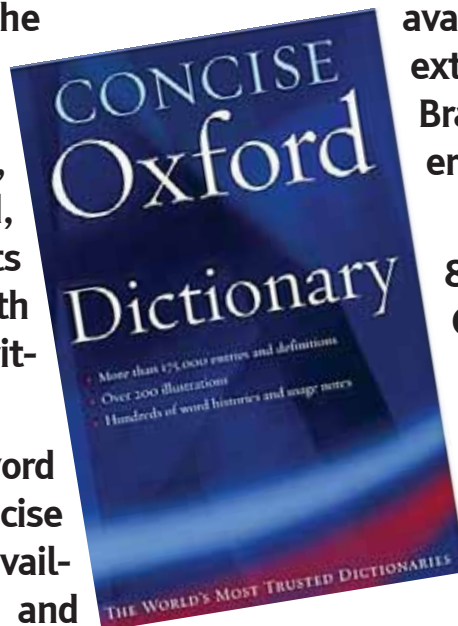

tistics. Each lesson is broken down into four parts: an explanation of the lesson, reading, writing and proof-reading exercises, all available on your BrailleNote mPower.

The Nemeth Tutorial is available as an option for the BrailleNote mPower BT and QT only, running the latest version of KeySoft.

Dictionary Available for BrailleNote and VoiceNote

The Concise Oxford Dictionary is available at your fingertips from anywhere within KeySoft 7.2 on the BrailleNote family of notetakers from HumanWare! You can find the meaning of a word, hear how it's pronounced, derivatives and more. Students can create vocabulary lists with word meanings to improve writing and comprehension skills.

Tired of using the same word over and over again? The Concise Oxford Thesaurus is always available with handy synonyms and antonyms.

The Combined Concise Oxford Dictionary and Thesaurus are available as an optional software extension for KeySoft 7.2 on the BrailleNote family of notetakers. The price is only \$195.

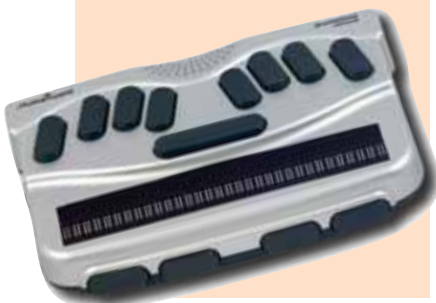

Call HumanWare today at 800-722-3393 to order the Concise Oxford Dictionary and Thesaurus for the BrailleNote family of notetakers and KeySoft 7.2.

Mountbatten Learning System

Literacy skills are basic to all learning, and learning is fundamental to every child's success. The Mountbatten Learning System is designed for children who need braille. It is a fun and inclusive introduction to braille literacy and provides a solid foundation for a life-time of learning. It is suitable for the very first stages of braille instruction but can be used up to high school level and beyond.

With its exceptional flex-

ibility and range of functions, the MB Learning System is a solution for meeting ever changing educational and teaching goals.

Assistive Technology and Braille Literacy

HumanWare has been empowering braille users and braille learners for years. Today the company, working with leading partners in the assistive technology industry, announced new steps in its Support for braille Literacy campaign.

"HumanWare's BrailleNote mPower already incorporates the well-regarded 'keyboard learn' braille learning feature," said Richard Mander, HumanWare CEO. "Now, we're working with partners

to make braille learning and on-the-go braille capability even easier."

In support of this effort, HumanWare has appointed Joann Becker Blindness Education Product Manager. Becker's extensive experience in braille technology makes her the ideal person to work with our partners in this important campaign. She will be conducting seminars and hands-on workshops on how technology facilitates braille literacy.

HumanWare Launches myReader2

myReader2 is now available and includes many enhancements and improvements of particular interest to educators. The myReader2 captures a full page of text and displays it the way your student wants to read, column, row or a word at a time. The new multipage storage capability allows the student to store up to 13 pages of text at a time, so there is less scanning and more reading. The most needed user interface features are now easier to access

and page processing is faster and smoother.

As before, the myReader2 is easily folded and transported from classroom to classroom. In a recent study, users reported an increase in reading speed and comprehension with the myReader2 versus a CCTV. A copy of the study can be obtained by calling HumanWare or visiting our website at www.humanware.com/Products/Auto_reader/Visio-Het-Loo-Erf.pdf

Schedule a BrailleNote mPower Workshop Today!
