ABOUT US

Since 1988, HumanWare has developed over 50 intelligent, intuitive solutions that have improved the lives of persons with a visual impairment, empowering them to thrive at home, in the classroom, and in the workplace.

Who we are

As part of the EssilorLuxottica group since 2013, HumanWare is recognized as a global leader. We design and make innovative, assistive technologies that transform lives, offering solutions in over 25 languages to help individuals around the world live with greater independence and confidence.

Our mission

Driven by our passion to innovate, we create cutting-edge technology that empowers students, seniors, and professionals with visual impairments or vision loss, helping them break new boundaries and live more independently. We are also committed to setting new standards in product development by designing solutions that enable our customers to unlock their full potential and maintain their autonomy.

Why choose HumanWare

Our technology has empowered over 1 million people worldwide, enhancing their quality of life and helping them thrive. Our dedicated, skilled employees, combined with our close-knit network of partners across North America, the United Kingdom, Australia (and beyond), all work together to promote literacy, inclusion, and accessibility for our community of users.

Product identifiers

The product identifiers reflect the specific target markets for which our products are designed, clearly defining the intended areas of use for each product.

Employment

MAGNIFYING solutions

Electronic visual aids enhance independent living by offering high-definition magnification, wider ranges, and greater contrast than traditional magnifiers. With options like handheld, portable, desktop, and smart reading magnifiers, as well as low vision software, you can boost productivity and enjoy life to the fullest.

Prologi software

powered by Humanware

Advanced low vision software solution

Customizable assistive technology that increases digital accessibility with magnification, text-to-speech, and seamless document accessibility.

Starter kit with document camera

Groundbreaking digital accessibility with magnification, text-to-speech, and seamless document accessibility. Quick, easy pairing with the Solo 8+ camera.

Complete kit with tablet

A complete, Bluetooth-enabled suite of tools centered around the Microsoft Surface Pro tablet, enabling independence and productivity in the digital world.

All-in-One PC

The All-in-One PC offers a seamless digital experience, combining magnification, text-to-speech, and document access to meet the needs of users with vision loss.

explorē 5

Pocket-size video magnifier

A compact, easy-to-use video magnifier that provides a clear, sharp image. Suitable for anyone with vision loss who is looking to see things up to 22x more clearly.

explorē 8

Handheld video magnifier

A compact 8-inch touchscreen magnifier ideal for anyone who needs an electronic reading aid for magnifying documents. 30x magnification is perfect for small tasks and reading at home or on the go.

explorē 12

Portable video magnifier

Three-in-one magnifier includes an integrated distance camera and foldable writing stand. 12-inch HD touchscreen is ideal for people who require a portable device with a slightly larger screen.

Reveal 16

Digital desktop magnifier

A foldable desktop CCTV video magnifier is ergonomically designed to make reading and writing enjoyable for long periods.

Reveal 16i

Smart desktop magnifier

Enjoy superior image quality on a 16-inch touchscreen with the intelligent video magnifier, featuring up to 10x optical zoom and 45x digital magnification for enhanced clarity.

Connect 12

Smart portable HD magnifier

Portable digital magnifier with high-definition magnification, online book access, dictionary, calculators, Google search, email, app downloads, and an optional distance camera.

With my macular degeneration, reading small text on boards used to be frustrating and isolating. But since getting my explorē 5 electronic magnifier, everything has changed. I can zoom in as needed, and it's a reminder that I can still enjoy the things I love without limits.

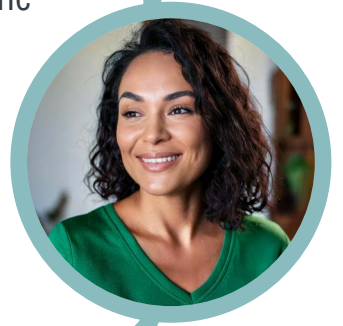

Judith, Australia

CLIENT testimonials

In comparison to the features of the iPad, ...the value in the ease of use for the Reveal 16i for a classroom situation makes it very easy for students to learn how to use this device in the general education setting.

Lori, teacher of the visually impaired, US

Prodigi is such a blessing. I would not give it up. I have read 2 books in the first couple of weeks I had it, and these books are over 500 pages long. I always use the Diamond Edge Text mode to read and follow along with the speech function. The Diamond Edge Text is so crisp and clean on the screen, my eyes do not get tired.

Thomas, Texas, United States

HumanWare explorē magnifier app!

Turn your phone into a magnifier to quickly read small text and view details. Its simple interface lets you **zoom**, adjust **brightness**, and **capture** images.

Perfect for mild sight loss or eye fatigue—
Download for FREE and start explorē-ing today!

READING machine

Reading machines enable printed texts—letters, books, magazines, medical packaging, food labels, and more—to be read aloud fluently. Powered by artificial intelligence, they also detect and describe images, enhancing the reading experience.

Odyssey

Desktop text-to-speech reader

An efficient desktop solution for capturing and reading printed text aloud. This compact, lightweight, and user-friendly TTS reader features large, tactile keys and operates on both battery and electrical power.

The Victor Reader Stream enabled me to read textbooks and retain valuable information that earned me an honor's degree in Business Administration. Now I'm employed by a nonprofit organization that helps visually impaired or blind people to live independently!

Tinetta, United States

AUDIO assistants

For those who find reading tiring, our Victor Reader line offers audio playback and digital book reading.

Victor Reader Stream 3

Handheld media player

Features a tactile, intuitive interface, this pocket-sized digital media audio player accesses wireless content like books, newspapers, web radio, music, and podcasts. 15 hours of battery life.

Victor Reader Stratus 12M

Daisy and MP3 player

A user-friendly multi-media player with a 12-key telephone-style pad ideal for efficient reading navigation. Provides access to DAISY books, recorded books, music, and computer documents.

ORIENTATION & MOBILITY

Digital orientation and mobility assistants are more than just walking aids; they provide exceptional audio guidance for daily navigation and use AI to identify elements in your surroundings.

StellarTrek

AI-powered GPS / OCR assistant

An AI-driven GPS and Optical Character Recognition (OCR) device that provides assistance in daily navigation. Combines state-of-the-art GPS functionalities with an intuitive, tactile interface, ensuring seamless guidance through voice prompts.

CLIENT testimonials

It makes a big difference to get my hands on a device made for relevant educational activities. The Monarch is a joy to use and its potential is enormous!

Jim, Senior teacher of visually impaired, UK

The Victor Reader really helps me with taking notes and learning my material in my classes. I have glaucoma, and my eyes get tired easily; I can just sit back and listen to my notes and take in information without straining my eyes. I can also listen to my books and enjoy them.

Jazzy, United States

The BrailleNote Touch Plus has been amazing for me so far. It combines everything I do on all my devices into one. I am a high school student who studies maths and 2 languages, Italian and Spanish, so I really appreciate the maths capabilities of the device and the ability to be able to write in multiple languages.

Tiana, student in Queensland, Australia

BRAILLE devices

Specifically designed for people who are blind and living with a visual impairment, electronic braille devices allow for greater independence and flexibility, whether at home, in a work environment, or on the go with a smartphone.

BrailleNote Touch Plus 32

Tablet and note taker

Combines the simplicity of a note-taking tool with the power of a smart digital device. Equipped with a touch screen making communication between students and teachers fully interactive.

BrailleNote Touch Plus 18

Tablet and note taker

The 18-cell notetaker with an ultra-fast processor combines the simplicity of a note-taking tool with the power of a smart digital device. Offers an immersive and connected experience in multiple languages.

Monarch

Dynamic, tactile,
multi-line braille tablet

The first dynamic, tactile, multi-line braille tablet, combining a graphing calculator, e-book reader, and braille. It pioneers inclusive, barrier-free access to information for all.

Braille BI 20X

Braille display

A smart, compact 20-cell refreshable braille display that you can pair with your favorite devices or use with standalone applications. Designed for mobility, comfort, and efficiency.

Braille BI 40X

Braille display

Powered by Bluetooth 5, this 40-cell braille display pairs twice as fast and offers four times the range for a stable connection. Includes text-to-speech for a hybrid notetaker experience.

Mantis Q40

Braille display

The first-ever Bluetooth® QWERTY keyboard and 40-cell refreshable braille display that you can pair with your screen reader or smartphone, or simply use as a standalone device.

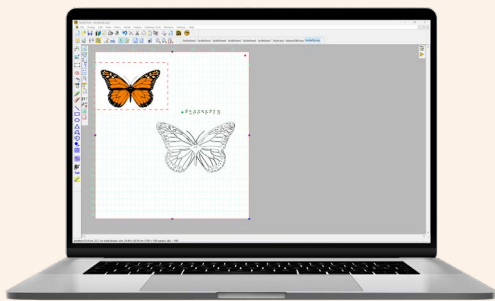

Absolutely love my new Mantis Q40.
Having the qwerty keyboard and braille
makes it so user friendly for everything
from reading books to using for work.

Kelly, England

EMBOSSING solutions

Our high-quality embossing solutions are designed to provide braille and tactile materials. Whether you need a compact solution for small-scale production or a robust model for larger educational and professional environments, our solutions offer exceptional reliability, speed, and precision.

TactileView

Tactile graphic creator suite

This full accessible software allows you to create, share, and download tactile drawings from an extensive online library, including a large cartography database.

Romeo 60

Braille embosser

A high-performance embosser, producing fast, high-quality braille and tactile graphics. Easily translate text into braille and create designs with TactileView software.

Juliet 120

Braille embosser

Sets a new standard in high-quality double-sided braille, with impressive speeds up to 140 characters per second. Creates documents and tactile graphics effortlessly using TactileView software.

 TactileView™ software included

Basic-D V5

Braille embosser

Produces high quality, single or double-sided braille and graphics on continuous fanfold paper at speeds up to 140 characters per second.

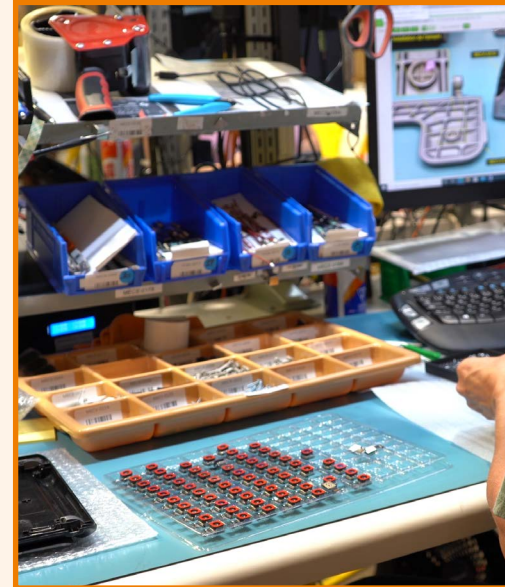

Everest-D V5

Braille embosser

Sets the bar for versatility in braille embossing, printing up to 140 characters per second. It supports braille in any format, automatic booklet printing, and high-resolution tactile graphics.

The **Humanware** difference

B-Corp certified

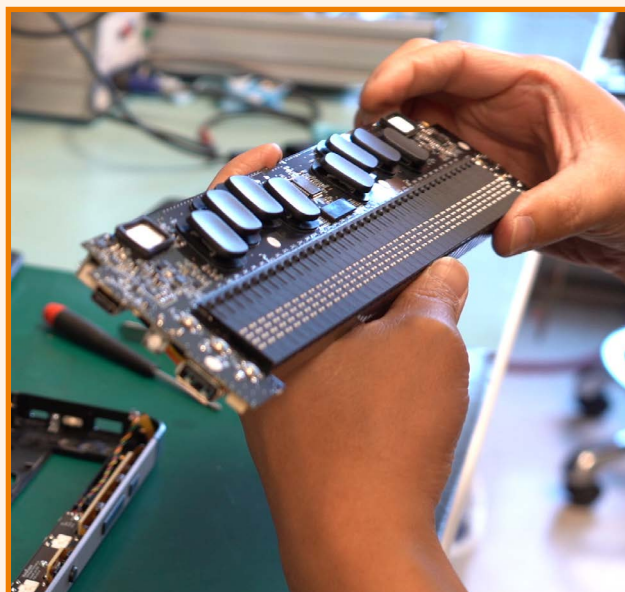

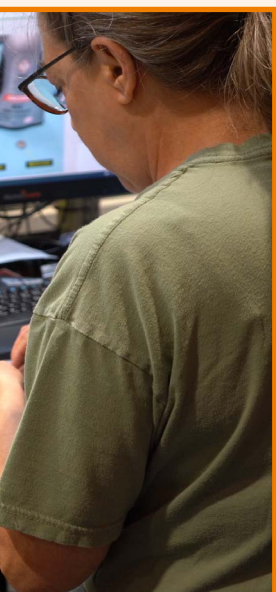

Our official certification as a B Corporation™ (B Corp) reflects our commitment to high standards and positive impact. This milestone highlights our dedication to empowering individuals with visual impairments to live independently and reach their full potential.

ISO 9001:2015

Our company is proudly ISO 9001:2015 certified, ensuring high standards of quality and customer satisfaction. This certification demonstrates our ongoing commitment to improving our quality management system and delivering products of the highest quality.

Client care

At HumanWare, we provide a worry-free experience through our premium care plans, extended warranties and software maintenance agreements for select products. Care plans for braille devices include coverage for accidental damage, loaner devices, and an annual braille display cleaning. Software Maintenance Agreements offer free updates and enhancements, ensuring your technology remains up-to-date and performing at its best.

In the event of a repair, we deliver high-quality service starting with a return merchandise authorization (RMA), followed by prompt repairs and timely return shipping.

We are committed to continually enhancing both our technology and customer service, ensuring exceptional experiences that strengthen trust in HumanWare.

Learn more about our products or arrange a personalized demonstration by contacting your nearest HumanWare office. Our team is ready to assist and answer your questions.
